

Syllabus
BSE 3170 – Advanced Accounting
North Park University
Fall 2012

Instructor: Ann Ownby Hicks
Phone: 773-244-4908
Office Location: School of Business and Nonprofit Management
Second Floor
E-mail: ahicks@northpark.edu
Texts: Advanced Accounting, 11th Edition, Hoyle, Schaefer & Douppnik – ISBN 978-0-07-802540-2

Course Overview:

This course is designed to provide students with the opportunity to learn the basics of: 1) fund accounting as applied to both governments and non-profit organizations, 2) consolidations for business combinations, 3) foreign currency and international aspects of accounting, and 4) partnerships.

Course Objectives:

After completing the course, students should be able to:

1. Recognize, understand and properly account for a variety of business combinations.
2. Properly prepare consolidated financial statements as of the date of acquisition and for periods subsequent to the date of acquisition.
3. Properly account for importing and exporting transactions denominated in foreign currencies.
4. Properly account for instruments used to hedge against foreign currency losses.
5. Describe and illustrate translation procedures for foreign currency financial statements, using both current rate and temporal methods.
6. Describe and account for partnership formation, earning distribution and dissolution.
7. Describe and illustrate the concepts associated with accounting for state and local governments, including modified accrual accounting and the use of budgets.
8. Describe and illustrate the financial statements used by state and local governments, including fund-based and government-wide.
9. Describe and illustrate the reporting that is required for operating segments of a consolidated company.
10. Describe and illustrate the approach that a company should take in preparing interim financial statements.

Course Policies:

Class participation and preparation of homework assignments are critical to understanding accounting concepts. Although I do not collect homework assignments except as described below, they are learning tools and it is to your benefit to prepare all homework.

Quizzes and exams will be announced in advance. **Students will not be allowed to make-up any quiz or exam unless it is approved by me prior to the testing date.** This means that you are not to assume a make-up quiz or exam has been approved until you have heard back from me via email or telephone.

Students are expected to be in attendance and arrive on time. Late arrival disrupts the class in progress, which is inconsiderate to your colleagues. **Cell phones are expected to be turned off and remain off during class. This means that no texting is allowed during class time.**

Students are expected to read the assigned material prior to the class period in which it is discussed and are expected to prepare homework assignments prior to the class period in which they are due. Homework problems will be assigned during class, based on the class discussions. If students are absent from class, it is their responsibility to contact a colleague or me to find out what transpired in class during their absence.

Since mathematical calculations are an integral component of the course material, students are expected to bring calculators to all class meetings. Students are allowed and encouraged to use calculators on all quizzes and exams and should come to the exams prepared with their own calculators. **Calculators will not be provided and sharing of calculators will not be allowed during quizzes or exams. In addition, cell phone and PDA calculators will not be allowed on quizzes or exams.**

Students are encouraged to review the university guidelines regarding academic honesty. These guidelines are summarized at the end of this syllabus. I will take any necessary steps to ensure that these guidelines are upheld in this class.

The course grade will be based on the following:

3 Exams (100 points each)	300
Homework	30
Case Study	25
Quizzes	80
Group Homework	100
Presented Homework	30
Attendance and Participation	<u>35</u>
Total	<u>600</u>

Homework

The preparation of homework is crucial to your success in this class. Homework will be assigned at the conclusion of the discussion of each chapter. I view this homework as a learning tool and, as such, do not collect and grade it. However, to help motivate you to prepare the homework, I will collect all homework related to the chapters under exam at each exam date. Each set of homework is worth 10 points.

Quizzes

There will be ten quizzes administered via Moodle throughout the semester. The due dates for the quizzes will be determined as we progress through the semester. Each quiz will be worth 10 points. Your two lowest quiz scores will be dropped. **If you have technical problems, i.e. you are kicked out of Moodle before finishing the quiz, you must email me immediately so that I can reset your quiz. No makeup quizzes will be accepted.**

Group Work

At the beginning of the semester, the class will be divided into groups. The groups are encouraged to work together throughout the semester as a study group. A great deal of learning can occur from each other and these groups are designed to provide that opportunity.

Collected Homework:

To aid you in developing this learning relationship, I will assign one homework problem from each chapter for the group to prepare together and turn in. Each problem will be worth 10 points to each group member. The problems must be turned in via Moodle by the start of the class period in which they are due. **No late problems will be accepted.**

Presented Homework:

Throughout the semester, each group will be required to present two homework problems for discussion. These homework problems will be assigned from the homework that is discussed during each chapter study. The presentation will be worth 15 points. **If any of the group members are not in class when their group is scheduled to present, the group will present without them and any members not in attendance will not receive credit for the presentation. The presentation will not be rescheduled.**

Case Study:

The case study will be described in a separate document.

Each group member will be given the opportunity to evaluate the contributions of their group members twice during the semester: Half-way through the semester and at the end of the semester.

Office Hours

Monday	10:30 a.m. – 12:30 p.m.
Tuesday and Thursday	3:30 p.m. – 4:30 p.m.
Wednesday	12:00 noon – 3:00 p.m.

I am available at other times by appointment.

Course Outline:

Seventeen	Accounting for State and Local Governments (Part Two)	
Eighteen	Accounting & Reporting for Private Not-for-profit Organizations	
Thirteen	Accounting for Legal Reorganizations and Liquidations	
Exam 3: Chapters 16 - 18, 13		

Students with Disabilities:

Students with disabilities who believe that they may need accommodations in this class are encouraged to contact the Center for Academic Services at 773-244-8500, advising@northpark.edu or stop by the office located on the 2nd floor of the Student Services Building. Please do so as soon as possible to better ensure that such accommodations are implemented in a timely manner. For further information please review the following website: <http://www.northpark.edu/ada>

Academic Honesty:

In keeping with our Christian heritage and commitment, North Park University and the School of Business and Nonprofit Management are committed to the highest possible ethical and moral standards. Just as we will constantly strive to live up to these high standards, we expect our students to do the same. To that end, cheating of any sort will not be tolerated. Students who are discovered cheating are subject to discipline up to and including failure of a course and expulsion.

Our definition of cheating includes but is not limited to:

1. Plagiarism – the use of another’s work as one’s own without giving credit to the individual. This includes using materials from the internet.
2. Copying another’s answers on an examination.
3. Deliberately allowing another to copy one’s answers or work.
4. Signing an attendance roster for another who is not present.

In the special instance of group work, the instructor will make clear his/her expectations with respect to individual vs. collaborative work. A violation of these expectations may be considered cheating as well.

For further information on this subject you may refer to the Academic Dishonesty section of the University’s online catalog.

In conclusion, it is our mission to prepare each student for a life of significance and service. Honesty and ethical behavior are the foundation upon which such lives are built. We therefore expect the highest standards of each student in this regard.
