^{*} Varies with PT program

The University offers a pre-professional program in physical therapy. This program is not a major in the strict sense, but is sequences of courses, which will establish an adequate foundation for entry into graduate professional study. Students who are contemplating entry into graduate professional program in physical therapy will understand the increasingly competitive nature of this field. North Park provides advisory services and foundation courses, which enable its graduates to compete very favorably for entry into such graduate programs. Close contact with the University's pre-professional advisors should be maintained throughout the student's residence at North Park

Notes:

- Student should contact or Dr. Linda Vick at (773) 244-5660 to discuss this pre-professional track.
- If the student is not a strong student in the sciences and considering majoring in Biology, they should start with Biology and begin the Chemistry sequence the second year.
- If the student is not a strong student in the sciences and considering majoring in Chemistry, they should start with Chemistry and begin the Biology sequence the second year.
- An internship in a physical therapy setting is strongly recommended.
- Individual physical therapy programs may have different requirements than those listed. It is the student's responsibility to meet the requirements of those programs of interest to the student.
