Notes:

- All majors are required to take and pass an objective departmental comprehensive exam in their final semester; or anyone failing that exam will be required to take and pass a department comprehensive essay exam.
- Students preparing for particular graduate programs should meet with their advisor to select appropriate cluster courses and electives, and plan enriching experiences such as internships or directed research.
- Students who wish to pursue doctoral studies in psychology should choose the BS option. Graduate psychology programs are extremely competitive and this curriculum offers the most thorough preparation.
- BS degree students must meet with their advisor to verify eligibility for additional required courses (science elective, topics, internship).
- If student meets the criteria for Honors and has a faculty sponsor, s/he may complete a senior honors project (PSYC 4000) as an alternative to an internship. Students particularly interested in an experimental PhD program should pursue this option.
